

Computer Training Classes by Appointment

Written by Lorraine Stone - Last Updated Thursday, 01 August 2013 10:27

We have enjoyed providing computer training classes and love to show people how to connect. Hopefully the participants of our previous classes have gone away with knowledge that will enable them to enjoy using online services and help them to keep connected to their kids and grandkids as well as all the Internet has to offer (such as games, search tools and entertainment). Originally we wanted to teach particular lessons, such as Word, Excel, Power Point, how to make business cards, brochures, posters, etc. But many had desired to work on a particular area.

If you'd like to take a computer training class, we are taking appointments and will assist in a one on one basis. We will either come over to the Community Center, to your place or to ours. Call and make an appointment!
